Everyone can live a healthy life.

Everyone can

Live like a Pro

People aspire to live a healthy life, but media makes it seem unreachable and only for the few, for the experts.

Everyone can achieve his or her own kind of perfection in everyday life. Everyone can be a pro in his or her everyday life. We all can be a pro in the way we deal with our friends and family, our jobs, our household, ourselves.

Now, inspired by Beko's passion to impact people's lives through its technology, we want to empower everyone to lead a healthier and happier lifestyle. We want to inspire everyone to

Live like a Pro.

HARVESTfresh™

Inspired by nature, powered by light

Even though they keep looking fresh, fruits and vegetables start to lose their vitamins when placed in the fridge. Thanks to innovative **HarvestFresh™** technology, vitamins are preserved for longer*. Unique crisper technology developed for Beko fridges uses not one, but 3 efficient colours, that mimic the 24 hours sun cycle and natural sunlight. All of this so you can enjoy nutritious meals and a healthier lifestyle.

*Tested by Intertek based on Vitamin C and Vitamin A measurements in tomato, green pepper, carrot, spinach and celery directly exposed to the light technology compared to Day 0 conditions over a 5-day period.

EVERfresh+®

Fruit and vegetables fresh up to 3 times longer

Beko **EverFresh+®** technology in your fridge is perfect for anyone who wants to live healthier, like a pro! People whose lifestyles revolve around healthy fruit and vegetables. Now, your fruit and vegetables won't go off after just a few days, they can sit comfortably in our special crisper compartment, staying fresh for up to 3 times longer*. The compartment's humidity is precisely controlled, and condensation is reduced via air channels, temperature variations are minimised, so your fruit and vegetables stay crisp and fresh. All this means that, thanks to Beko **EverFresh+®** technology, your fresh food is just as tasty as it is healthy for longer.

*Tested by SGS (compared to standard crisper for broccoli and lettuce)

IonGuard®

Get rid of bacteria for long-term food storage

You need fresh air inside the refrigerator, but don't want to check it every day. The active ioniser neutralises bacteria, viruses and particles in the refrigerator by using negative ions. It allows the air inside the fridge to circulate and stay clean so food can be stored for much longer.

ProSmart™ Inverter

Prosmart Inverter Compressor
High efficiency,
high durability, low noise

ProSmart™ technology will adapt and create less temperature variations, cooling your food quickly. This inverter compressor is also four times quieter than the compressor in your average fridge*

* Tested by internal laboratories

NEOfrost™ Dual Cooling

Faster cooling for longer freshness

It's important to keep the food fresh for longer in the refrigerator. Also, it is difficult to keep fish in the freezer together with a lovely cake in the fridge without their odours mixing. Beko's separate cooling system technology for each compartment provides faster cooling by maintaining ideal air flow and optimal temperatures with an optimal level of humidity in both the freezer and the fridge. The result is the food stays fresh for longer with no frost build-up or odour transfer.

Active Fresh Blue Light

Preserve Vitamin C in fruit & veg

Let your crisper protect the natural flavours and nutrients of the fruit and veggies you put in your fridge, particularly the health benefits of Vitamin C. The **Active Fresh Blue Light** helps fruit and veggies to continue photosynthesizing, so they will be juicy, vitamin-rich and plump.

Washing Machine

Front Load

AQUAtech™

Half the time, twice the care.

Beko **AquaTech™**, a groundbreaking washing technology, replaces drum movement with power of water. Using the strength of water in this way saves time up to 50% without sacrificing any of the washing performance. Plus, up to 50% gentler to your clothes compared to conventional fast programs. Beko **AquaTech™** premixes water and detergent and sprays the mixture directly onto fabric. This ensures proper penetration into the textiles and ensures a thorough wash. This new technology of Beko is a huge time-saver and ensures textiles are treated gently.

STEAMcure

Easier to remove stains

SteamCure™ technology ensures a better cleaning and washing performance with additional benefits by using steam that rises from the bottom of the drum. When steam is distributed into the drum at the beginning of the program, it softens up dirt, making it easier to remove and giving you ideal washing results.

AIRtherapy®

Warm air, fresh feelings.

Not all households have a washer dryer. But there are still times when you need to refresh your clothes. Presenting the world's first washing machine with warm air circulation! Beko **AirTherapy®** technology can wash and make your clothes ready to wear and prevent unwanted creases when you don't have time to take the laundry out of the machine at the end of the program. It even keeps your drum clean and hygienic!

Fast+Function

Faster cleaning

With the push of a button, you can shorten the length of programmes by up to 55%, so now the washing can go as fast as you want it to.

SuperXpress

in just 14 minutes

You wear some clothes more often than others. This means you wash them quite often and you may need quicker programs. Beko SuperXpress program is ready when you are in a hurry. Its 14 minute cycle is convenient for those garments that are only a little bit dirty.

AddXtra™

Add clothes after the machine starts

People sometimes forget some things after they start the wash. Beko AddXtra™ will let you to add garments within 5 minutes of the program's start, so you don't need to be upset when you forget that one last sock!

Duvet/DownWear Program

Fluffy garments protection

Are your precious garments going to lose their fluffiness when you wash them? Not on our watch! With Beko's **Duvet/Down Wear program** in your washing machine, you can now wash your favourite down feather coats and duvets with the ultimate care they deserve. Thanks to a special spinning cycle, they won't lose any of their volume or cosiness.

Washing Machine

Top Load

PROIntense

High pressure quick soluble detergent that has two parts. Detergent Case & Solution Case. Gentle water current will be injected into the Detergent Case. The detergent will enter into Solution case evenly and slowly while stronger water current will be poured into the Solution case to dissolve the detergent. This process will last around 30 seconds.

BTU8086W

Prosmart Direct Drive

Direct Drive Motor directly attach itself to the inner drum to lower energy consumption, lower noise level and higher durability.

AquaSonic

Uses high vibration to achieve greater washing performance, coupled with reduced usage of detergent and water. Generating 20,000 vibration waves per second, it helps to remove dirt more efficiently.

BTU100BW

Air Dryer

Superior drying in 90 minutes reduce most of the moisture remaining in clothes.

3D Fine Wash

3D water to help detergent penetrate deeper into the fabric, dissolves detergent completely.

STEAMcure

Easier to remove stains

SteamCure™ technology ensures a better cleaning and washing performance with additional benefits by using steam that rises from the bottom of the drum. When steam is distributed into the drum at the beginning of the program, it softens up dirt, making it easier to remove and giving you ideal washing results.

Wash&Wear®

1 kg in 1 hour

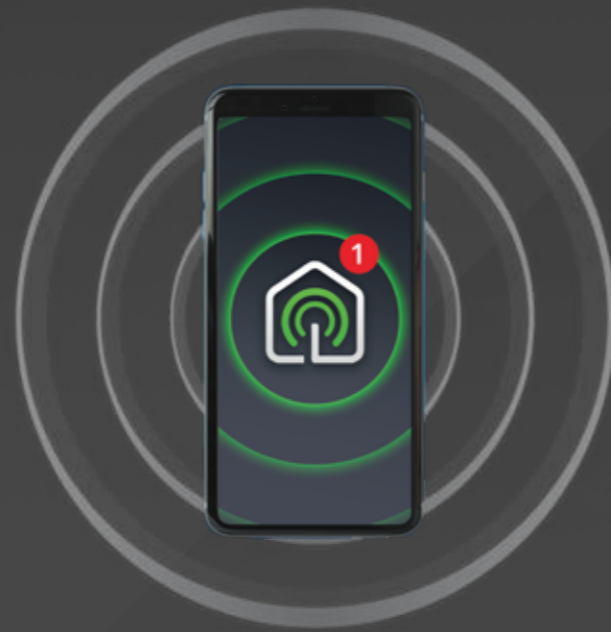

Was that date really today? You've got no clean clothes, your lucky top is in the dirty basket and you've got to catch the train in an hour. Fortunately for all of you last-minute-date types, the **Wash & Wear®** program in your Beko washer dryer can get a shirt washed and dried in the machine in barely no time at all. Choose from temperature settings of cold- 20° - 30°C and get up to 1kg (5 shirts) washed and completely dried in an hour. You go in the shower, your favourite shirt goes in the wash.

HomeWhiz

Smart assistance for better performance

With HomeWhiz smart home application you can connect your smart appliances and other smart devices to your mobile device, allowing you to control and monitor them from anywhere. Tell the wizard what you want and it will recommend the most suitable programs for you. You can also adjust and customize some programs in detail, according to your changing needs.

ProSmart™ Inverter Motor

High efficiency, high durability, low noise levels

Don't stress about your energy bill or give yourself a headache every time you wash and dry your clothes. Thanks to its brushless motor design, ProSmart™ offers superior energy efficiency, lower sound levels and higher durability - all in a single machine, so you get the most from your machine without disturbing your monthly budget or piece of mind.

GentleCare™

Keeps cottons safe

Your favourite clothes need more care. Beko's **GentleCare™** program washes your cotton clothes more gently, helping to protect their texture and colour and making sure they last longer. It also uses just half the energy of a 40°C wash*.

*Tested by 3rd party laboratories

Fast+ Function

Faster cleaning

Shorten the length of programmes by up to 55%, so now the washing can go as fast as you want it to.

Xpress Super Short (14')

2 kg in 14 minutes

You wear some clothes more often than others. This means you wash them quite often and you may need quicker programmes. Beko Xpress Super Short program is ready when you are in a hurry. Its 14-minute cycle is convenient for those garments that are only a little bit dirty.

AquaWave® Technology

Gentle yet effective

No need to worry about your favourite shirt. With the Beko **AquaWave®** system, a specially designed drum pattern gently moves your laundry in a wave-like drum action so your clothes move smoothly around in the drum. The AquaWave® glass in the door is curved too, and specially designed paddles move the clothes more easily, giving a better mixing effect while increasing cleaning performance.

Hygiene+

Hygienic cleaning at any temperature

With Beko **Hygiene+** Program, you can get Premium hygienic cleaning results for all your laundry at any temperature (20°C - 90°C) with custom drum movements, sensitive temperature control and additional rinse and spin cycles. The 60°C cycle eliminates 99.9% of allergens and approved by Allergy UK.

Tumble Dryers

AirTouch

Gentlest way to dry even “do not tumble dry” clothes

If the idea of putting your softest silk sweater or favourite sneakers in the tumble dryer gives you goosebumps, let Beko’s new no-tumble hot air system ease your worries. Beko tumble dryers equipped with **AirTouch** technology can dry even the most delicate of fabrics and even those “Gentle Dry with AirTouch” clothes safely. With this feature, tumbling in the dryer drum is cancelled and hot air is blown from underneath the load for gentle drying. With GentleDry, your silk or linen shirt, wools, shoes, hats and lingerie are at safe hands.

Duvet/Downwear

Fluffy garments protection

Are your precious garments going to lose their fluffiness when you dry them? Not on our watch! With Beko’s **Duvet/Down Wear** program in your tumble dryer, you can now wash your favourite down feather coats and duvets with the ultimate care they deserve. Thanks to a special spinning cycle, they won’t lose any of their volume cosiness.

StackingKit

A space saving solution

You need more space when you put your tumble dryer next to the washing machine. With **Stacking Kit** accessory you can place your tumble dryer on top of your washing machine and save space for an extra cupboard. It also comes with a pull out tray providing a place to organize your laundry.

OptiSense®

Optimised drying cycle with smart sensors

No need to guess how long your clothes will take to dry. Advanced humidity and temperature sensors let you choose how dry you want your clothes. The dryer will stop automatically when your clothes are as dry as you want them. 1 extra smart sensor looks after your machine by detecting voltage surges too, protecting it by cutting off the power and helping it last longer.

Air Conditioning

ProSmart Inverter R32

Excellent energy savings up to 60%! Beko ProSmart Inverter air conditioner give you an exceptional energy saving performance.

Conventional non-inverter air conditioner can only operate at a constant speed which might be too powerful for maintaining the temperature.

The compressor runs at maximum load at every moment. This results in wide temperature fluctuation leading to wasteful consumption of energy.

Beko ProSmart Inverter air conditioners regulate the rotation speed of the compressor, providing a method of maintaining temperature at it most energy efficient state.

No mould or bacteria

Self Clean

Self Clean prohibits bacteria from breeding in the air conditioner. A super slit fin in the indoor unit helps your air conditioner condensate water. So when you turn the unit off, it will appear to continue running to ensure the coil surfaces are totally dry. This is to protect them from getting rusty. The unit will then come to a total stop automatically. This is to provide cleaner air to our users. Top protection, 24/7.

Zone Follow

More precise and effective temperature control. The remote control sensor will sense the temperature around the user to ensure the temperature is even for the comfort of the user. Zone Follow function provides user with maximum comfort.

Dream Mode

Four different night modes for adults, elderly, youngsters, or children. Delivering the ideal temperature and air flow speed during 8 hours of sleep. The air conditioner is able to scan the room temperature and adjust to the conditions. When the room is below 26°C, the unit automatically increases 1°C during the rest hour, after the sleep control is activated.

ActiFour Filter

Beko air conditioners come with ActiFour Filter, an extra protective combination of 4 filters: HEPA, Photic Catalyst, Silver Ion and Catechin. This powerful combination helps keep away pollen, dust, germs, bacteria, fungi spores, pet fur, and even odours.

reaches every corner

4 filters, extra protection

4D Air Outlet

Activate the direction of the airflow vertically and horizontally using the remote control. Your air conditioner covers a wide area, reaching every corner of your room. You can now cool every inch of your room as you focus on your tasks in total comfort.
