256 L Platinum Frost Free Freezer

No Frost- We understand that defrosting the ice build-up in your freezer is a time-consuming and frustrating job. That's why our range of freezers offers Frost Free technology which automatically defrosts the freezer so you don't have to.

Prosmart Inverter Compressor - Thanks to its innovative design, the ProSmart™ Inverter Compressor provides faster cooling with less energy and four times quieter operation than average refrigerator compressors. It adapts to temperature fluctuations quicker, keeps food fresh longer and saves on your energy bills, all at the same time.

Freezer Guard - Whether you need to place your freezer in your garage, your outbuilding, or anywhere else in your home, our Freezer Guard technology ensures your freezer will always function properly, keeping your frozen food frozen whatever the outside temperature - even if it drops to as low as -15°C.
