## HarvestFresh

### Inspirisan prirodom, pokrenut svetlošću

Vitamini u voću i povrću se više ne gube u frižideru! HarvestFresh tehnologija u 3 boje oponaša 24-časovni ciklus sunca unutar posude, čuvajući vitamine duže. Ova jedinstvena tehnologija u vašem frižideru će vam omogućiti da uživate u hranljivim obrocima i zdravijem načinu života.

## Kompresori sa VDE sertifikatom

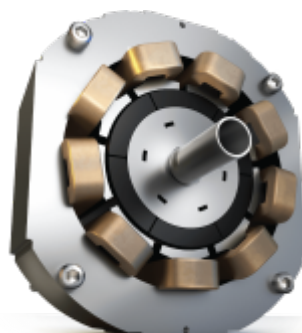

Naši kompresori, koji su sertifikovani od strane VDE, obezbeđuju svežinu vaše hrane uz dokazanu pouzdanost tokom 25 godina.

Iskusite vrhunsku inovaciju u oblasti Beko rashladnih uređaja, gde su najsavremenija tehnologija i trajni kvalitet naša prednost. Naši frižideri su opremljeni inverter kompresorima koji su detaljno testirani i sertifikovani od strane VDE za životni vek od 25 godina. Ovi kompresori su kamen temeljac funkcionalnosti našeg frižidera, pažljivo dizajnirani da održavaju optimalno okruženje za hlađenje. Uz Beko, ulažete u frižider koji je napravljen za dugovečnost i dizajniran da održava svežu hranu iz dana u dan.

## ProSmart Inverter Compressor

### High efficiency, high durability, low noise

If your fridge is a humming, gurgling energy-hog, it's time to make the switch. Thanks to its innovative design, the ProSmart Inverter Compressor provides faster cooling with less energy and four times quieter operation than average refrigerator compressors. It adapts to temperature fluctuations quicker, keeps food fresh longer and saves on your energy bills, all at the same time.

## CoolRoom

### Meat, fish & dairy fresher for longer

Meat, fish, and dairy need lower temperatures to stay fresh. The CoolRoom compartment keeps these products at just above freezing temperatures and maintains optimum humidity. That way, food remains fresh and full of flavour for up to twice as long.

## FlexiLift

### Height-adjustable door rack

Getting everything in your fridge can be a challenge, especially with taller items like bottles. FlexiLift gives you more control over the positioning of one of the door racks. You can adjust its height by up to 8 cm, even when loaded, giving you plenty of space below.

## Led Illumination

### Clear view of the inside

It can be tricky to see everything in your fridge, especially in the corners and at the back of selves. Led Illumination features chains of LED on the top of the fridge, and for every shelf on the side wall so you can see clearly throughout the cooler. It's more energy-efficient than standard lighting too.

## Safety Glass

### High-durability glass shelves

Ease your worries of putting that huge and heavy pot in the fridge with Safety Glass. Safety Glass shelves are made up of tempered glass and can carry loads of up to 25 kg. They resist cracks and scratches much better than un-treated glass, so you can store heavy items without a care.

## Vacation Mode

### Extra energy saving

Get your fridge in the holiday spirit when you leave for vacation. Vacation Mode saves energy by shutting down the cooler section but keeping the freezer running. Frozen food will be preserved while you save on energy bills.
